

About BullsEye:

Founded in 1999 | 99% customer retention rate | Single source for multiple solutions | One invoice

BUSINESS CONCERN:	SOLUTION:
Have rising POTS prices made it more difficult for you to budget for your communications expenditures?	Rest assured, budgeting is easy with price stability for the duration of the contract and limited regulatory fees.
Is having a redundant solution for your critical applications (Alarms, Elevators, E911, Pool Phones, etc.) important to your organization?	We offer a two path solution - 1st with a broadband connection and 2nd with a Verizon wireless data plan. These enable continuity of service & deploy quickly.
You recognize the need to upgrade, but have concerns about up front costs, training and ongoing maintenance.	Our solution has no upfront costs or hidden fees. Everything you need is covered in most of our plans.
Concerned about budgeting wireless data usage for critical applications?	Wireless pooling across the enterprise insulates against data overage charges.
What happens during a power outage, will my systems fail and how will I know?	Automatic notifications keep you informed. 8-hrs of talk time and up to 24-hrs of standby usage with a back up power system and wireless data package to keep you completely covered.

Solution Highlights

- 1. Consultation & Design**
We help identify line use cases.
- 2. Order Management**
A dedicated order manager is assigned to oversee the entire deployment.
- 3. Project Management**
Professional white glove installation at each location.
